Prevent Snow Slide Risks on Premium Synthetic Roofs

THE CHALLENGE

Synthetic roofing is built for extreme performance—offering exceptional longevity, high wind and hail ratings, and eco-friendly durability. However, its smooth, slick finish creates a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS WR316

Purpose-Engineered for synthetic systems, the WR316 adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

WR316 WIRE LOOP PAD-STYLE SNOW GUARD

Seamless Safety

Keep your roof line looking clean. Blend high-performance safety seamlessly into your roof line with our minimalistic loop design.

Lifelong Durability

Your snow retention should be as durable as your roof. Our mill finish styles are designed to match the lifespan and beauty of synthetic roofs.

Watertight Security

Protect your roof from leaks. Our loop design mechanically fastens directly through the roof deck to create a secure, weathertight seal

Secure Strength

Remain worry-free during harsh winters. Our design delivers optimal strength, made of 45lb electroplated Galvanized Steel wire to withstand intense environmental exposure.

WR316 | Galvanized Steel

Roof Types	Materials	Finishes
Natural Slate and Shake, **Synthetic Slate and Shake**	Galvanized Steel (GAL)	Mill Finish, Powder Coating (additional charge) using RAL TIGER Drylac® Exterior Colors
