

Prevent Snow Slide Risks on Standing Seam Roofs

THE CHALLENGE

Standing Seam roofs are built for long-term reliability—offering exceptional durability, extreme weather resistance, and sleek design. However, their smooth, slick surface create a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS ASG33G

Purpose-engineered for standing seam roofs, the ASG33G adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

ASG33G PAD-STYLE SNOW GUARD

Decorative Safety

Add character to your roof line. Blend high-performance safety and visual interest into to your roofline with our unique design.

Warranty Protection

Protect your roof's warranty. Oval-point set screws securely attach to the seam without piercing the metal, ensuring your roof's warranty remains intact.

Secure Strength

Remain worry-free during harsh winters. Our versatile clamp securely attaches to a wide range of metal standing seam profiles, including single lock, double lock and snap lock profiles, to deliver reliable snow retention.

Substantial Safety

Take on whatever winter throws your way. The robust 6" L x 3 9/32" H x 1/8" thick pad creates a strong surface area to physically hold back snow and ice, making it optimal for snow management on standing seam roofs
