Prevent Snow Slide Risks on Metal Batten Roofing

THE CHALLENGE

Metal roofing is built for long-term reliability—offering exceptional durability, extreme weather resistance, and sleek design. However, it's smooth, slick surface create a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PP315

Purpose-engineered for metal batten roofs, the PP315 is a durable barricade system engineered to hold the snow mass in place until it sheds gradually, offering superior protection in high snow load areas.

PP315 PIPE-STYLE SNOW GUARD

Built-in Adaptability

Enjoy specialized snow retention. Fits seamlessly into tight spots, like between minor ribs, on batten caps, and around skylights, so you can maximize coverage without complex re-engineering.

Watertight Security

Protect your roof from leaks. Designed to be mechanically fastened, when properly installed the PP315 ensures a watertight barrier.

Flexible Protection

Get the specific protection level you need. Available in 2-pipe, 3-pipe, or 2-Hi-Pipe configurations and compatible with ice flags to match the snow load requirements of your region.

Buildable Retention

Customize your retention level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection.

PP315 | Brass with Stainless Steel

Roof Types	Materials	Finishes
Metal Batten	Aluminum w/Stainless Steel Base Plate & Aluminum Accessories (AL)(SS), Brass w/Stainless Steel Base Plate & Brass Accessories (BR)(SS), Brass w/Brass Base Plate & Brass Accessories (BR)	Mill Finish, Powder Coating (additional charge) using RAL TIGER Drylac® Exterior Colors
